PROFILE

Senior Frontend and Full Stack Developer with 3+ years of experience building production web applications, enterprise SaaS, ERP platforms, e-commerce products, and developer tools. Strong experience with React, Next.js, TypeScript, modern state management, API integration, backend services, reusable component systems, and performance optimization. Currently expanding into AI-native software development, LLM integrations, automation, and intelligent developer experiences.

EXPERIENCE

Freelance 06/2025 – present | Addis Ababa, Ethiopia

FrontEnd Developer | Private Clients & Independent Businesses

- Work directly with clients to understand requirements, translate ideas into technical solutions, and deliver production-ready web experiences.
- Build responsive and SEO-optimized websites, e-commerce platforms, and custom web interfaces using React.js, TypeScript, and Tailwind CSS.
- Transform Figma designs and business concepts into high-fidelity, accessible, mobile-first interfaces.
- Build reusable UI components and maintainable frontend structures that can evolve with changing business requirements.
- Integrate REST APIs and manage client-side state with Zustand and modern React patterns.
- Independently handle frontend delivery from requirements analysis and UI implementation through API integration, debugging, optimization, and production preparation.
- Selected client project — Kaladoo Coffee: Responsive e-commerce/web platform built with React.js, TypeScript, and Zustand, with REST API integration, mobile-first UI, SEO considerations, and customer-facing functionality.
- **Technologies**: React.js, TypeScript, Tailwind CSS, Zustand, REST APIs, Figma, Git.

Echnoserve, *Full Stack Developer* 02/2024 – 01/2026 | Addis Ababa, Ethiopia

- Developed responsive and accessible production web applications using React.js, TypeScript, Tailwind CSS, and Redux.
- Built and integrated RESTful backend services with Node.js and Laravel for authentication, business workflows, and data processing.
- Designed reusable frontend components and maintainable application structures across multiple features and projects.
- Implemented Redux and Redux Saga for complex asynchronous workflows and application-wide state management.
- Used React Query for server-state management, caching, synchronization, and efficient API data fetching.
- Collaborated within an Agile development environment on feature delivery, debugging, testing, and continuous improvement.
- **Technologies**: React.js, TypeScript, Tailwind CSS, Redux, Redux Saga, React Query, Node.js, Laravel, REST APIs, MySQL, Git.

EDUCATION

HiLCoE School of Computer Science and Technology 01/2019 – 07/2023 | Addis Abeba, Ethiopia
Bachelors of Science in Computer Science

TECHNICAL SKILLS

React | Next.js | TypeScript | Javascript | Node.js | Laravel | React Native | Figma

PROJECTS

Enterprise ERP Platform, *Next.js, React, TypeScript, Tailwind CSS, TanStack Query, Node.js, MySQL*
- Architected end-to-end modules for Inventory, POS, Multi-store Warehousing, Purchasing, Sales, and CRM with role-based access control (RBAC).
- Engineered offline data indexing and high-speed search for instant retrieval of inventory, store, and business records.
- Built an interactive chat assistant using indexed ERP data alongside modular frontend architecture with TanStack Query.

DevOS — Local AI-Powered Developer Workflow Manager,
React, TypeScript, Node.js, Local LLMs, Automation
- Integrated offline local LLMs to provide private, contextual AI assistance without relying on external cloud APIs.
- Designed project-aware workflows to organize tasks, manage technical context, and track active sprint progress.
- Automated repetitive development and planning routines via interactive desktop and terminal automation pipelines.

EUDR & Tree-Based Restoration Registry, *React, TypeScript, Laravel, Tailwind CSS, REST APIs*
- Engineered regulatory compliance tracking systems for forest conservation and environmental restoration data.
- Developed interactive geographic tree maps and dynamic visual analytics dashboards for spatial data monitoring.
- Implemented automated reporting modules to streamline cross-border compliance and export documentation.

Developer OS & DagiComponents, *react-dagis | React, TypeScript, Tailwind CSS*
- Created and published an open-source React component library (react-dagis) on NPM with full TypeScript support.
- Built a modular developer OS portfolio showcasing customizable, accessible, and high-performance UI components.
- Optimized bundle size and component rendering speeds using clean atomic styling and tree-shakable exports.

Website Builder & Kaladoo Coffee Platform, *Next.js, Redux Toolkit, Express, MongoDB*
- Developed a custom drag-and-drop website creation platform paired with a direct-to-consumer e-commerce portal.
- Built responsive, mobile-first layouts with smooth UI animations and optimized server-side rendering in Next.js.
- Translated complex Figma mockups into production-ready UI components integrated with RESTful checkout APIs.

SOFT SKILL

Performance & UX Focus — Balancing code efficiency, SEO, accessibility, and intuitive end-user workflows
System Architecture & Problem Solving — Breaking down complex business logic (e.g., ERP modules, RBAC) into clean, maintainable systems
Teamwork — Partnering with UI/UX designers, backend teams, and clients to ship features smoothly
Time Management & Delivery — Delivering milestones on schedule in fast-paced Agile/Scrum environments

CERTIFICATES

AWS Certified Cloud Practitioner
