PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 3+ years of experience delivering production SaaS, ERP, e-commerce, and compliance applications. Strong in React, Next.js, and TypeScript, with hands-on ownership of frontend architecture, reusable component systems, API integration, state management, and performance. Also builds backend services and cross-platform desktop tools, bringing an end-to-end perspective from requirements and design handoff through implementation and deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ESNext), Python, Rust, PHP, SQL, HTML5, CSS3

Frontend: React, Next.js (App Router, SSR), React Native, Tailwind CSS, Vite, component architecture

State & Forms: TanStack Query, Zustand, Redux / Redux Saga, React Hook Form, Zod

Backend & APIs: Node.js, NestJS, Express, Laravel, REST API design, RBAC

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Desktop & AI: Tauri 2, Rust, libmpv, PyTorch (CUDA), faster-whisper, CTranslate2, SciPy, Win32 API

Tools & Practices: Git, GitHub, AWS, npm publishing, Web Vitals, SEO, Agile/Scrum, Figma-to-code

WORK EXPERIENCE

Lead Frontend Developer | Loom · erp.loomaddis.com **Feb 2025 – Present**

Addis Ababa, Ethiopia

- Own frontend delivery for LoomERP, a modular cloud ERP, working closely with a backend developer across POS, inventory, multi-branch warehousing, purchasing, CRM, and online storefront workflows.
- Delivered five integrated modules as the sole frontend developer and applied role-based access control throughout the application.
- Built offline data indexing and high-speed search for enterprise records, store data, and inventory catalogs.
- Improved server-state consistency and reduced redundant requests with TanStack Query caching, optimistic updates, and cache invalidation.
- Standardized validation for complex nested workflows using React Hook Form and Zod.
- Developed the customer storefront with branch-specific inventory and pricing, category filtering, authentication, and SEO metadata.
- Implemented an offline chat assistant that retrieves answers from indexed ERP data, reducing reliance on external AI services.

Freelance Frontend Developer | Private Clients & Independent Businesses **Feb 2025 – Present**

Addis Ababa, Ethiopia

- Work directly with founders and stakeholders to translate Figma designs and requirements into responsive, accessible production applications.
- Built Kaladoo Coffee (kalado-coffee.vercel.app), a full-stack e-commerce application using React, TypeScript, Tailwind CSS, Zustand, Express, and MongoDB; implemented cart flows, mobile checkout, and REST integration.
- Create reusable UI components and modular frontend structures to accelerate iterations and maintain consistency.
- Manage frontend delivery from requirements and API contracts through implementation and Vercel deployment.

Full Stack Developer | Echnoserve **Feb 2024 – Jan 2025**

Addis Ababa, Ethiopia

- Contributed to a government EUDR compliance platform featuring interactive geographic tree mapping and spatial visual analytics.
- Developed application modules with React, TypeScript, Tailwind CSS, and Redux within an Agile team.
- Built and maintained Node.js and Laravel REST endpoints for authentication, business logic, and regulatory data processing.
- Improved server-state caching and synchronization with React Query and managed asynchronous side effects with Redux Saga.

SELECTED PROJECTS

LoomERP — Enterprise Cloud ERP & SaaS Platform

Stack: React, TypeScript, Vite, Next.js, Tailwind CSS, TanStack Query, Zustand, RHF, Zod, Node.js, MySQL

- Designed a modular dashboard supporting POS, accounting, and inventory domains with clear module boundaries.
- Optimized client caching and local indexing to reduce repeated server round trips in multi-branch retail workflows.
- Maintained typed interfaces across hundreds of API payload contracts and complex UI states.

Qale — Offline Voice-to-Code Desktop AI Assistant

Stack: Python 3.13, PyTorch/CUDA, faster-whisper, CTranslate2, SciPy, AST-inspired parsing, WebView2, Win32 API

- Reduced measured dictation latency from 1.8 seconds to 150–250 ms (approximately 7–12×) by moving inference from CPU to NVIDIA GPU with FP16.
- Built speech-to-code transformations for six programming languages, covering code primitives, brackets, operators, and casing conventions.
- Detects active IDE/terminal context to prioritize technical vocabulary for TypeScript, Python, Rust, and DevOps.
- Added an audio DSP pipeline with an 80 Hz Butterworth rumble filter and dynamic RMS gating to improve recognition quality.
- Implemented clipboard-preserving Win32 text injection for non-destructive code dictation.

EYTAA — Modern Desktop Media Player

Stack: Tauri 2, Rust, React, TypeScript, libmpv, SQLite, Tailwind CSS

- Built a lightweight native Windows media player with Tauri IPC and libmpv hardware-accelerated playback.
- Designed SQLite-backed indexing for large local media libraries to keep library queries and memory use efficient.
- Implemented playback controls, audio-stream switching, and subtitle-track selection in React and TypeScript.

Open Source & Developer Tools — Libraries and browser-based tools

Stack: React, TypeScript, Tailwind CSS, Node.js, npm, CodeMirror, Babel Standalone, Redux, Vite

- Published react-dagis and DagiComponents component/scaffolding packages on npm, with accessible components, tree-shakable exports, and TypeScript definitions.
- Built Component Craft, a browser-based React sandbox with CodeMirror editing, live Babel compilation, iframe preview, and ZIP export.
- Created Custom Component, a visual design-token generator that exports React and Tailwind code.

EDUCATION & CERTIFICATION

B.Sc. Computer Science — HiLCoE School of Computer Science and Technology **Jan 2019 – Jul 2023**

Algorithms, Data Structures, Database Systems, Distributed Systems, Software Engineering

AWS Certified Cloud Practitioner — Amazon Web Services (Active) · Credly verification
